

# SmartEIA Bordetella parapertussis IgM

EAN Code: 8595635306044 Catalog number: SK-BppM96 Package size: 96 tests Storage: 2-8 °C Producer: TestLine Clinical Diagnostics s.r.o.

### **Description:**

- Microtitre wells are coated with a combination of selected parts antigens specific for Bordetella parapertussis.
- If specific antibodies are present, they bind to the antigen, are labeled by the Conjugate in the following steps and are detected by color reaction with a single component substrate (TMB-Complete).
- The kit allows 96 tests, including controls in a split microtiter plate with color-coded strips and breakable wells.

#### Advantages:

- The total assay time is about 2 hours.
- High sensitivity and specificity of the test.
- Kit includes CUT-OFF, Positive Control and Negative Control.
- Semi-quantitative evaluation in the Index of Positivity (IP).
- Ready-to-use, color-coded components. .
- Single-component substrate. •
- Interchangeable components with the exception of kit specific components (Controls, Conjugate, Plate).

#### **Application:**

- Serological determination of antibodies to Bordetella parapertussis.
- Diagnostics of post-infection and post-vaccination antibody response.

#### Brief assay procedure:

- 1. Dilute samples (1:101).
- 2. Pipette Controls and diluted Samples.
- 3. Incubate at 37°C for 30 min.
- 4. Aspirate and wash the wells 5×
- 5. Pipette Conjugate.
- 6. Incubate at 37°C for 30 min.
- 7. Aspirate and wash the wells 5×
- Pipette Substrate (TMB-Complete). 8.
- Incubate at 37°C for 30 min. 9.
- 10. Pipette Stop Solution.
- 11. Read color intensity at 450 nm.
- 12. Evaluate the test.

## SmartEIA kits are specifically designed for automated processing on the Agility® instrument, Dynex Technologies, Inc.
